

My name is Whitney Ann Cadagin. I graduated with a B.S. in occupational therapy from the University of Missouri-Columbia. I was fortunate enough to complete part of my clinical education in the Spinal Cord Injury (SCI) Service at the St. Louis VAMC. In December 2002 a position became available on the SCI Service and I was selected to join the team.

Since then I have developed an interest in Assistive Technology (AT), specifically computer AT and environmental control units. I really enjoy working with patients with more physically involved injuries, educating them about the possibilities technology can afford. Aside from my strictly clinical interests, I thoroughly enjoy the National Veterans Wheelchair Games and the Winter Sports Clinics. As a coach for these events, I am able to witness first hand the importance of independence and participation outside of the clinic and hospital. As a therapist, it is an amazing opportunity to experience the holistic aspect of rehabilitation that we strive for.

I can be reached in my office (GS14) or at 314-652-4100 or 800-228-5459, ext. 6-4503.
